

## PVC 228SKA

### General description

Nitto PVC 228SKA is a flame-retardant electrical insulating tape consisting of a pure PVC carrier coated with a rubber-based pressure sensitive adhesive. The tape is certified for electrical purposes and classified under IEC 60454-3-1-7/F-PVCp/90 and applicable for in- and outdoor uses. Due to its flexibility and conformability at low temperature, PVC 228SKA has a minimum application temperature of  $-18^{\circ}\text{C}$ .

### Construction

-Rubber adhesive  
-PVC film

### Characteristics

Nitto PVC 228SKA is a genuine "soft" tape. No fillers of any kind are used to guarantee excellent physical properties. A good balance between adhesion strength, unwind force and film flexibility assures outstanding workability, high conformability and good sealing properties. The tape can be applied at very low temperature ( $-18^{\circ}\text{C}$ ). Nitto PVC 228SKA is a 190 micron thick PVC tape with excellent electrical insulation properties and is self-extinguishing. The tape has a good resistance against abrasion, moisture, oils and solutions with acids and alkaline. The PVC tape is suited for outside use thanks to the good ageing and weatherability properties.

### Application

Nitto PVC 228SKA is an electrical insulation tape for professionals with excellent conformability even in cold weather.

## CORE FUNCTION

TO BLOCK

### Features

- excellent workability: high conformability, no flagging, excellent elasticity, non-sticky sides
- good weatherability & UV resistance
- good sealing properties
- self-extinguishing
- good moisture and chemical resistant
- filler free plasticized PVC
- RoHS compliant (2011/65/EC, 2015/863)
- REACH compliant

Edition: January 2020  
Code: DS/06.09/ PVC 228SKA ENG  
This datasheet replaces all previous versions

## Properties

	Typical Value	Test Method
Total thickness	0.19, 0.025 mm	EN 60454-2
Tensile strength	73.5 N/19mm	EN 60454-2
Elongation	221%	EN 60454-2
Adhesion to BA steel	4.30 N/19mm	EN 60454-2
Adhesion to backing	3.63 N/19mm	EN 60454-2
Withstand voltage (5 kV/min)	Pass	
Volume resistivity	2.1 x 10 <sup>13</sup> Ohm cm	
Peeling off	Adhesives shall not be transferred to back face of next layer	JIS C 2336
Adhesion at low temperatures	1.50N/10mm or more	EN 60454-2
Electric strength (at room temp)	40 kV/mm or more	EN 60454-2
Flammability	Non-ignitable or self extinguishing	EN 60454-2

CAUTION: The above are typical values and should not be used in writing specifications.

## Warranty

The warranty period from NITTO DENKO SHANGAI SONGJIANG CO. LTD. to your company is in principal 18 months after delivery. However, the shelf life of this product is 3 years after manufacture. But the tape must be stored indoors at normal temperature (5-35 °C) and normal humidity (45 to 85 %RH) as delivery-packaged in the place where direct sunlight does not affect.

## Availability

Colours: black

Widths: 19 mm Lengths: specified length

Please contact us for other dimensions

## Application guidelines

- The tape should be applied on a clean and dry surface.
- Apply the tape with a moderate tension and with an overlap of 50%.

General conditions of use and precautions: The properties of the product might be adversely affected by various elements such as composition, condition and surface of and impurities in or on the substrate, temperature and humidity during storage, the surrounding environment at and after application and time of exterior use. When the product is used in combination with another material or process, the user shall assure the compatibility of the product in such combination and whether this combination results in the expected performance. The same principle applies in the event of product use in extreme conditions or circumstances, whether at or after the moment of application, including extended exposure to sunlight or extreme temperatures and pressure.

Packaging, transport and storage: During transport and storage the product should always be protected against direct sunlight and extremes in temperature and humidity and contained in its original packaging. Once removed from its packaging, it should be promptly applied and remain shielded from direct sunlight and extreme temperature as well as protected against dust and other impurities.

### Liability:

Except for its wilful misconduct, Nitto Belgium's liability shall be limited to a replacement, a reimbursement or an additional delivery of the product, and shall not exceed the purchase price of the products. In no event shall Nitto be liable in respect of any indirect or consequential damages, including loss of profits. The above limitations of liability shall equally apply if Nitto Belgium has assisted in any manner with the selection, treatment or application of the product.

### Product information:

This datasheet provides a general description of the product properties and application scope. Full technical details in connection with this product are presented in the customer product specification, which is available upon request.

The information reflected in this datasheet is subject to change and the product described herein may be modified or discontinued without notice.

Nitto Belgium NV has obtained following certificates:

- ISO 9001
- ISO 14001
- IATF 16949

Please check our website for applicable scope

If you require additional information on technical properties and application as well as product sampling or testing, please contact your local Nitto sales office.
